LE COLISÉE

I

BIENVENUE

Nous sommes ravis de vous présenter notre interprétation du célèbre Colisée de Rome. Qu'il évoque des souvenirs d'un voyage à Rome, éveille en vous un intérêt pour l'architecture classique ou vous permette de vous détendre, nous espérons qu'il vous offrira des heures de plaisir de construction LEGO®.

Jamie Berard, responsable du design

LE COLISÉE

Le Colisée, qui se trouve au cœur de la capitale italienne, est un symbole de la Rome antique impériale. L'impressionnant amphithéâtre, le plus grand jamais construit à l'époque, pouvait accueillir entre 50 000 et 80 000 spectateurs. Ils s'y réunissaient pour assister à des combats de gladiateurs, à des chasses aux animaux et même à des reconstitutions de célèbres batailles navales. Considéré comme l'une des sept nouvelles merveilles du monde, le Colisée est également l'une des plus grandes attractions touristiques, avec plus de 7 millions de visiteurs par an.

Alors que les théâtres grecs antérieurs étaient construits à flanc de colline, l'imposant Colisée se dresse au milieu d'une vallée plate au cœur de Rome.

AMPHITHÉÂTRE

Le Colisée est une structure elliptique autonome de 189 m de long et 156 m de large. L'arène intérieure de forme ovale mesure 87 m de long et 55 m de large et est bordée d'un imposant mur de 5 m, surmonté de rangées de gradins. Le mur extérieur du Colisée s'élève à une hauteur impressionnante de 48 m et était encore plus haut avec le toit mobile en tissu, soutenu par un gréement et des mâts en bois.

La structure était entourée de 80 entrées au rez-de-chaussée. Les 4 entrées axiales principales, réservées à l'empereur et aux élites de la ville, étaient somptueusement décorées.

CONSTRUCTION

Plus de 100 000 m³ de travertin ont été utilisés pour construire le Colisée, dont 45 000 m³ uniquement pour les murs extérieurs. Plus de 300 tonnes d'agrafes de fer (se substituant au mortier) maintenaient les pierres ensemble. La façade extérieure de la structure est composée de 3 niveaux distincts, chacun doté de 80 arcades imposantes. Dans l'arène, un plancher de bois recouvert de sable cachait une structure souterraine complexe appelée *hypogée*.

HYPOGÉE

L'hypogée était un réseau souterrain à deux niveaux, composé de tunnels et de cages, ajouté après l'achèvement du Colisée initial. C'est là que les gladiateurs et les animaux se tenaient avant les spectacles. Suite à la construction de l'hypogée, l'arène ne pouvait plus être inondée pour recréer des batailles navales épiques.

Le Colisée est également connu sous le nom d'amphithéâtre flavien, en référence aux 3 empereurs de la dynastie flavienne qui l'ont construit puis modifié.
