F1 W14 E Performance

EL RENDIMIENTO AL DETALLE

Desarrollar coches de carreras para el Campeonato del Mundo de Fórmula Uno es un proceso cíclico. En el equipo de LEGO® Technic entendemos que una carrera, al igual que cada set que lanzamos, conlleva una evaluación del rendimiento, la optimización de las tecnologías y técnicas disponibles, y una serie de pruebas que producen información objetiva. Repetir este proceso de forma sistemática es lo que, en última instancia, nos lleva más allá de nuestros límites. La escudería Mercedes-AMG PETRONAS F1 Team y sus pilotos han establecido constantemente nuevos puntos de referencia para el automovilismo en la última década. Entre su regreso como constructor en 2010 y el final de la temporada 2022, el equipo Mercedes-AMG F1 consiguió 116 victorias, 264 podios, 128 primeras posiciones en la parrilla de salida, 91 vueltas rápidas y 54 dobles en un total de 259 carreras. El Mercedes-AMG F1 W14 E Performance de 2023 representa la culminación provisional de estos triunfos, y convertirlo en un modelo era, sencillamente, una tarea irresistible para el equipo de diseño de Technic.

UN MILLÓN DE HORAS

"Fabricar un coche de F1 es una operación increíblemente compleja que requiere alrededor de un millón de horas de trabajo, antes incluso de que el vehículo llegue al circuito. Cientos de personas trabajan en múltiples departamentos diseñando, fabricando y modelando un monoplaza de F1.

Los propios coches se componen de subconjuntos, que se construyen por separado y luego se unen a los demás para crear el producto final. Entre esos subconjuntos se cuentan la unidad de potencia, la caja de cambios y las secciones de la carrocería. A su vez, cada subconjunto está formado por cientos de componentes individuales.

Todos los componentes que ponemos en el coche deben probarse de diferentes maneras para verificar su integridad y asegurar su resistencia. Departamentos como el de Pruebas y Desarrollo o el de Inspecciones y Ensayos no Destructivos son fundamentales para garantizar que las piezas sean fiables y muestren un inmejorable rendimiento en la prueba definitiva: una carrera real. A partir de ahí, el trabajo de los ingenieros a pie de pista es optimizar la eficiencia del coche que tenemos y proporcionar a los pilotos la mejor herramienta posible".

James Allison, director técnico de la escudería Mercedes-AMG PETRONAS F1 Team

JENSEN
Diseñador de
LEGO® Technic

MERCEDES-AMG PETRONAS F1 TEAM X TECHNIC

"La decisión de reducir el peso de su coche de carreras insignia para 2023 llevó a la escudería Mercedes-AMG PETRONAS F1 Team a crear el icónico diseño del W14. El uso de fibra de carbono disminuye el peso del chasis y elimina el de la pintura que solía utilizarse en los modelos más antiguos. Los aficionados al automovilismo también pueden reconocer el negro como un guiño a los colores distintivos de 2020. El negro realza magníficamente la expresión agresiva y dominante de este emblemático coche, algo que, obviamente, queríamos replicar en la versión LEGO® Technic.

Trabajando en estrecha colaboración con la escudería Mercedes-AMG PETRONAS F1 Team, replicamos el diseño del W14 con sus características más impresionantes y sus funciones clave (en menos de un millón de horas). Desarrollamos tres nuevos paneles para recrear las exclusivas curvas del modelo real. El alerón trasero puede moverse para simular el sistema de reducción de carga aerodinámica, y la dirección funciona tanto desde el interior del coche como girando la rueda situada en la parte superior. Si retiras la cubierta del motor, podrás observar el motor V6 con pistones móviles, así como el diferencial y las barras de empuje y tracción de la suspensión. Unos nuevos neumáticos lisos de gran realismo y los tapacubos de las ruedas completan el icónico aspecto del vehículo de verdad".
